PROFESSIONAL SUMMARY

Motivated M.Sc. Computer Science student specializing in Computer Vision and Deep Learning. Experienced in building real-time object detection systems using YOLOv8n, achieving state-of-the-art performance metrics including 0.952 Precision, 0.951 Recall, and 0.976 mAP@0.5 at ~118 FPS. Proficient across the full ML pipeline — from data preprocessing and model training to evaluation and deployment. Skilled in Python, PyTorch, and Streamlit. Seeking entry-level roles in Machine Learning or AI Engineering.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, SQL

Machine Learning & Deep Learning: Computer Vision, Object Detection, YOLOv8, CNN, Model Training & Evaluation

Frameworks & Libraries: PyTorch, Ultralytics, OpenCV, NumPy, Pandas

Web & Deployment: Streamlit

Concepts: Data Preprocessing, Data Augmentation, Performance Metrics (Precision, Recall, mAP)

Tools: Git, GitHub, VS Code, Kaggle

PROJECTS

Traffic Sign Detection Using YOLOv8n

- Developed a real-time traffic sign detection system using YOLOv8n trained on 5,011 images across 21 classes.
- Achieved high performance metrics: Precision 0.952, Recall 0.951, mAP@0.5 0.976, and ~118 FPS inference speed.
- Implemented data preprocessing and augmentation techniques to improve model generalization and robustness.
- Built a Streamlit web application for real-time image-based detection, displaying bounding boxes and confidence scores.

Tech Stack: Python, PyTorch, Ultralytics YOLOv8, OpenCV, NumPy, Streamlit

EDUCATION

M.Sc. Computer Science

2026

St. Joseph's College (Autonomous), Devagiri, Kozhikode | University of Calicut

Bachelor of Science in Computer Science

2024

Farook College (Autonomous), Kozhikode | University of Calicut

CERTIFICATIONS

- Data Science – Power BI & Machine Learning
- Full Stack Development – MERN Stack
